Y6 began the term with a Week of Inspirational Maths in which we looked at different aspects of maths in very practical ways. The children enjoyed solving problems which did not necessarily have a 'right answer' and using a range of equipment to carry out their investigations. We also took on board the idea that making mistakes can actually cause your brain to grow. Throughout the term we have looked at efficient methods of adding and subtracting, including written methods when appropriate. The children particularly enjoyed spending an imaginary £2000 in revamping their bedrooms. Some of them proved to be

In Year two this term some of our learning has been focused on finding out which numbers are more than or greater than another number. The children drew the greater than symbol on A3 paper and used some Mathematical manipulatives to compare

A little problem to solve.....

How many months of the year have an odd numbers of days in them?
