9th June 2016

Year 6

This week we have been enjoying reading some mystery stories by Kevin Crossley-Holland with a view to the children writing their own. If you have any to tell, please share them with your child as we need to collect as many ideas as possible. We have also been looking at the clues authors put into their writing which allow us to predict what might happen next.

In maths we have been exploring volume and investigating cubes and cuboids. In science we have been looking closely at skeletons and have been lucky enough to borrow two life-sized examples from APHS.

Year 5

Year 5 have done another stint in the school garden this week. Our potatoes are coming on well and we have planted seeds for several summer vegetables. We are looking forward to going to Holkham and Egmere next week to find out more about bug hotels and cultivating crops.

Year 4

In Year 4 next week we will be continuing to look at solids, liquids, and gases. We will also be looking at the melting and boiling points of different materials. In literacy we will be looking at the mission survive books and picking apart and improving our sentence structure. In maths we will be looking at measuring and recording temperatures, as well as solving word problems involving temperature.

Looking forward to seeing you all at our Story Cafe on Monday 13th June, at 13:30.

Year 3

Year 3 enjoyed a visit from the Education Co-ordinator at Holkham, who addressed our assembly on Tuesday morning. He told us all about the things that they grow on the farm there, and about the different animals they have. We are all looking forward to our visit there on Tuesday 14th June and are hoping to learn lots more about where our food comes from.

The play area should be great fun too!

Year 1

This half-term Year 1 will be investigating the question "Why can't a Meerkat live in the North Pole?"

We have begun by reading the story 'Meerkat Mail' and writing questions we would like to find out about Meerkats.

We have spent some time researching the Kalahari desert and even made our own rain gauge to compare weather patterns.

Staff changes - I will be writing to all parents next week regarding staff changes for September. Thank you. Mr Ogle

As summer has at last arrived please remember to give your child a sun hat. Sun cream must be put on at home before school starts. We cannot do this for children during the school day. Flip flops are not suitable for school so please make sure that children wear shoes. Thank you for your full support with this.
