

This week we have been thinking about wheeled vehicles and how we use them to get about. The school bus is one way to get the children to school when they are older.

Wheels are round, so we looked around the Nursery School for other round things. We found them everywhere!

We also returned our pond creatures to the school pond. The children were very sensible as they carried their bucketful of water and weed around to the pond before releasing their contents. We watched as pond skaters and other water creatures swam away.

Juliet Hardy and Cat Cameron (Nursery Team).
