

This week, continuing with our water theme, we have been thinking about bubbles. Ruben wanted to make the bubbles bigger so they were easier to catch. We experimented with the large, open circles. The bubbles were huge!

In maths we have been looking at solid shapes. We talked about the different uses for a variety of solid shapes.

It was great fun throwing the plastic balls into the different size plant pots. The children quickly learnt that it was easier aiming for the larger pots. Others enjoyed collecting them ready for their friends to use!

The children also enjoyed their transition mornings at the beginning of the week. They had great fun exploring the Reception Class, taking part in their phonics session too.

Diary dates- We will be holding another Story Café next week, on Thursday 26th May from 11am until 12noon in the Nursery School.

Our Class Assembly has been changed to June 9th, 9-05am in the School Hall.

We look forward to seeing you.

Juliet Hardy and Cat Cameron (Nursery Team)
