

This week the children have been thinking about how we can get off our island. They made a boat using a large box. It was a great collaborative effort.

In our Maths Café we heard the story of Noah's Ark. We thought about the mathematical language involved in the story and then showed our grown-ups how to use Numicon.

After that, we made clay animals. It was lovely to see everyone getting really involved in all the activities. Thank you for coming.

We hope you have a very happy half term!

Juliet Hardy and Cat Cameron (Nursery Team)
