

What fun we have had this week with all your battery run toys. Thank you to all who have very kindly shared them with us. It never failed to amaze us how clever our children are when confronted with a technical problem. If a robot or car wouldn't start, the children automatically checked for switches, turning the toy over until they found them.

The children experimented with torches, making dens by draping blankets and sheets over tables and chairs to see the torch light. They also used torches to make shadow pictures.

Moving toys continue to prove popular with our children. Here, the children are enjoying exploring some new toys. They quickly work out how they work and start to incorporate them into their imaginative play.

Next Friday we will be involved in the Whole School Maths Day, participating in activities set up for each class.

On Thursday 9<sup>th</sup>, February we will have our next Story Café.
