

This week we have been finding out how to look after minibeasts. In order to learn how to pick minibeasts up carefully, without hurting them, we have been practising with the tweezers.

We have also been creating a tadpole habitat in the outside water tray. We collected stones for the tadpoles to hide in, then, filled the tray up with water and pondweed ready for our tadpoles.

Inside, we had jelly in the water tray, which was really lumpy, just like frogspawn! The children continue to be creative, learning through practical activities.
